# StreamOne<sup>®</sup> Ion

We're excited to share latest StreamOne<sup>®</sup> Ion updates which introduce significant enhancements, driving efficiency, flexibility, and a better user experience.

In the category of Commerce as-a-Service, the new **Global Search** is enhancing navigation and access to critical information, while **Platform Translations** (available in 16+ languages) have been enhanced.

New **Price Override** capabilities increase pricing flexibility and customization at any point in the sales cycle, and **Advanced Quoting Management** empowers resellers to seamlessly create, manage, and share quotes, even with prospects who are not yet registered as customers in the platform.

In Aggregation & Orchestration, updates to **IBM MaaS360 with Watson and SPSS Statistics** simplify transactions and management within the ecosystem. The integration of **AvePoint, Acronis, and Google into the Work Queue Management (WQM)** Tool improves order failure handling.

## Commerce as-a-Service

### UI EFFICIENCY

Designed for usability and accessibility.

### GLOBAL REACH

Enabling solution delivery worldwide.

### Global Search

The search experience has been optimized to enable users to efficiently access information across the Marketplace, Subscriptions, and Customer modules.

### Platform Translations Enhancements

All language translations have been reviewed and updated for all user interface labels in the platform.  
*Did you know? StreamOne<sup>®</sup> Ion is available in 16 languages!*

### SALES CYCLE

Optimizes the chain of commerce to help you sell more.

### Pricing Override

New updates enhance flexibility, customization, and customer engagement by allowing tailored pricing and personalized deals within quotes and subscriptions.

### Feature Highlight: Advanced Quoting Management

Allows resellers to create, manage, and share quotes within the platform, streamlining the sales process and improving communication of pricing and product options.

- Create multiple scenarios for customers to compare
- Send quotes to leads and prospects in addition to current customers
- Digitally approve or reject quotes

## Aggregation & Orchestration

### OPERATIONAL EFFICIENCY

Automates processes and provisioning to reduce manual workload or effort.

#### **AvePoint, Acronis, and Google on Work Queue Management (WQM) Tool**

Automatically logs all order failures, allowing TD SYNEX regional cloud sales and operations teams to identify errors and retry failed actions proactively.

### FRictionLESS TRANSACTIONS

Streamlines product buy flow for improved efficiency, speed and accuracy.

#### **IBM MaaS360 with Watson and SPSS Statistics update**

Standardizes the Product Details page for IBM products, making transactions and management easier for partners.
